

~~CONFIDENTIAL~~

15 May 1968

MEMORANDUM FOR: D/DCI/NIPE

SUBJECT: War Game

1. Attached is a memo of a conversation with representatives of Air Force regarding their use of the War Game developed by [REDACTED] under contract with CIA. Since the government has largely paid for the development, the use by any government agency is justified, and has been agreed to by [REDACTED]. On the other hand, because [REDACTED] has contributed something to the development on their own (largely in the early stages prior to being funded) they retain the right to utilize the basic model within their organization. All of the input data and specific game results have been classified to a degree that makes it impossible for them to utilize throughout their company and they have also agreed not to utilize input data nor results beyond our specific contract.

25X1A

25X1A

2. My recommendation to Air Force that [REDACTED] be given consideration on any Air Force sponsored modification contracts is based both on their proven expertise and on a vaguely defined proprietary air associated with their early unfunded developmental work.

25X1A

3. With your approval I will send the attached letter to Air Force, in which the Office of Computer Services (OCS) is named the primary contact. This is because currently they are planning a small continuation of the CIA work with [REDACTED] with the idea of building an in-house program modification capability in addition to our current in-house operating capability.

MEMORANDUM FOR: Department of the Air Force
Attention: AFNIE

SUBJECT: Air Force Utilization of Arsenal
Exchange Model

25X1A

1. I am pleased to concur with all of the points of your memo, same subject, dated 6 May 1968. In order to be of maximum assistance to your rapid acquisition of what I consider a useful tool, the points of contact identified are: Mr. [REDACTED] (Code 143 Ext. 4041), and Mr. [REDACTED] (Code 143 Ext. 5113). 25X1A

2. I am anxious for us to work closely together in this matter to ensure that we both are able to exploit current and future versions of the Arsenal Exchange Model.

3. In the interests of clarification, let me emphasize that in addition to the proven expertise of [REDACTED] in the use and modification of the Model, there might well exist a residual proprietary interest on their part based on their early unfunded work. 25X1A
